I have a big problem with my car (Audi A4 2003 1.8t) now, I am almost positive its a bad ECM, but I want to make sure... The car was running fine one day and all of a sudden it started to cut out like it was not getting any fuel over 2500rpms. I have a WideBand A/F ratio gauge and it was not getting fuel at anything over 2500 rpms.
