## **Born Of Heat And Pressure**

1) In a transfer of energy as heat without work being done, there are changes of entropy in both the surroundings which lose heat and the system which gains it. The increase,  $\Delta S$ , of entropy in the system may be considered to consist of two parts, an increment,  $\Delta S'$  that matches, or 'compensates', the change,  $S'$ , of entropy in the surroundings, and a further increment,  $\Delta S$  ...
