The user can create, shape and manipulate data/digital information from systems and networks, convert real objects/entities into data and vice versa, etc. and higher level user can create and manipulation statistics and they automatically become true and factual Applications. Artificial Intelligence Creation; Artificial Life Creation through data.

Data Manipulation | Superpower Wiki | Fandom

The universe of available data elements is presented to the user via a semantic layer. The semantic layer, what Cognos calls the "Catalog" or what Business Objects calls the "Universe," is a combination of direct links to the atomic database elements (e.g. Customer Name) and derived or calculated elements (e.g. Customer Gross Profit %).

Team Building Games, Training, Ideas and Tips

It is no secret that the game development industry is growing dramatically. In the U.S. only, the market value is expected to exceed \$200 billion by 2023. This article will take an insider look at something many consider a product's cornerstone in the expanding game industry — a game design doc — a GDD.. Although GDD is a game's building block, its role in game production is shifting.
