The majority of children who experience maltreatment do not become adults who abuse or neglect their own children. Our review of nearly 3 decades of research on the topic reveals that intergenerational patterns of child abuse and neglect are far more complex and nuanced than originally understood. This issue brief explores what is currently known about intergenerational patterns of ...

allegations or findings of abuse and/or neglect of a child, psychologists conducting assessment in these matters seek to develop sufficient expertise in assessment of child maltreatment that is often beyond the scope of general clinical psychology practice (Ethics Code 2 ...

Guidelines for Psychological Evaluations in Child Protection Matters

Begin by saying something positive about the child. You might point out several things you really like about the child — his smile, curiosity, love of puzzles. Or you might mention something positive the child did recently such as helping a friend or learning a song. Say something positive about the child's relationship with the parent.
