All over the world, wild places are in trouble. As the human population has increased, we've taken over more and more land for our homes, farms, factories and roads. In the rainforest, around 80,000 acres of trees are cut down every day to make way for farming, or to provide wood for industry. In other countries, habitats like grasslands, underwater habitats, and wetlands are also at risk ...

How open should you be with your coworkers? These days many workplaces are encouraging their employees to be vulnerable and authentic, but opening up at work can feel precarious. If we open up the wrong way, it can sometimes backfire but vulnerability can also bring us closer to other people and make teams stronger. The key, according to author, podcast host and vulnerability researcher Brené ...

How to be vulnerable at work without spilling everything ...

Land use involves the management and modification of natural environment or wilderness into built environment such as settlements and semi-natural habitats such as arable fields, pastures, and managed woods. Land use by humans has a long history, first emerging more than 10 thousand years ago. It has been defined as "the purposes and activities through which people interact with land and ...

This doesn't come cheap: €3 billion gets you an additional 17 stations added to the existing Metro network. Some of the cost can be explained by the fact that It is not easy to build a Metro in Copenhagen, a city that is on the whole scarcely above sea level, and with a dense urban fabric too. It's due for completion in 2018, but that's later than the initial estimate and with the date ...
