City-regional environmental problems such as ambient air pollution, inadequate waste management and pollution of rivers, lakes and coastal areas. Extra-urban impacts of urban activities such as ecological disruption and resource depletion in a city's hinterland, and emissions of acid precursors and greenhouse gases.

What are Key Urban Environmental Problems?

Chapters 3 and 4 describe a proposal for managing wastewater in coastal areas within the framework of integrated coastal management. A dynamic planning process is described, that permits management strategies and the means for implementing them to be selected from among a wide range of alternatives.
