Hip Flexor Muscles and Anatomy for Personal Trainers

Recent clinical evidence bears out the fact that repeated short-term fasting does not cause muscle loss. In a 2010 study of alternate daily fasting, patients were able to lose significant fat mass with no change in lean mass. In this schedule, subjects eat normally on feeding days, and alternate that with a day of fasting.

Dr. Jason Fung: Does fasting burn muscle? - Diet Doctor

A general recommendation we like to give is a 4/1 ratio. We like to see our athletes gaining at least 3 times longer than they are cutting. And with contest prep seasons, it depends on how hard the previous diet was, how long it lasted, and how much improvement needs to be made before we consider the next one.
