Gm Stationary Engines

The engines were also sold for marine and stationary applications. In a 1938 reorganization, Winton Engine Corporation became the GM Cleveland Diesel Engine Division, and GM's Detroit Diesel Engine Division began production of smaller (50–149 cu in (0.8–2.4 l) per cylinder) diesel engines. Locomotive engines were moved under the GM Electro Motive Division (EMD) in 1941, while Cleveland Diesel retained development and production of large marine and stationary engines.

List of GM engines - Wikipedia

IRRIGATION AND POWER UNIT PACKAGES - Husker Power Products

Set the points too wide and the spark plugs don't get enough juice -- your engine whimpers. Set them too close and the engine works fine for a few miles. Then it stops because the points are so badly burned they can't perform their function. The Haynes manual recommends a point gap of .016-.020 inches for engines used in the P1800.

Setting Ignition Points - Glenn Goodspeed

Renew Your General Motors Powerplant. ATK builds remanufactured crate engines with higher quality than new. Every engine is reverse engineered, allowing ATK to find and remove any factory original defect. This attention to detail and quality will save you time and money by keeping your Chevrolet or GMC out of the shop and on the road.
