The later you can afford the better, particularly as the 2010 model is quite an old car now, without even considering the possibility of an issue with the gearbox. I would recommend you go for a model that is no more than five years old. It would be also be a good idea to have it assessed by an automatic transmission specialist.

### Volkswagen Polo Gearbox & Transmission Problems | CarsGuide

The other possibility, of course, is that, at 428,000km (a pretty good innings for one of these vehicles) the actual internal bits of the gearbox are so worn that the thing is jumping out of fifth in protest. If that's the case, an inspected, second-hand replacement gearbox from a wrecking yard would be the most cost-effective solution.
