78 CHAPTER 2. Vectors for mechanics 2.6 Center of mass and gravity For every system and at every instant in time, there is a unique location in space that is the average position of the system's mass. This place is called the center of mass, commonly designated by  $cm$ ,  $c.o.m.$ ,  $COM$ ,  $G$ ,  $c.g.$ , or  $\cdot$ .

More formally, dynamics is the branch of mechanics that deals with the effect that forces have on the motion of objects. In contrast, statics is the study of forces without motion; or more formally, the branch of mechanics that deals with forces in the absence of changes in motion. Dynamics implies change. Statics implies changelessness.
