1. Introduction. The isolation of monolayer graphene flakes by mechanical exfoliation of bulk graphite opened the field of two-dimensional (2D) materials. Since then, many other 2D materials have been discovered, such as transition metal-dichalcogenides (TMDs, e.g., MoS₂), hexagonal boron-nitride (h-BN), and black phosphorous or phosphorene. The family of 2D materials offers a

When we compared our results with flight data, we found that many of the CO₂ profiles produced by our organic salt samples were similar to the CO₂ evolutions observed by the rover. The best fits with our laboratory data included Martian materials acquired from modern eolian deposits and sedimentary rocks that had evidence for low-temperature ...
