Ringer's lactate solution (RL), also  
known as sodium lactate solution and  
Hartmann's solution, is a mixture of  
sodium chloride, sodium lactate,  
potassium chloride, and calcium chloride  
in water. It is used for replacing fluids  
and electrolytes in those who have low  
blood volume or low blood pressure. It  
may also be used to treat metabolic  
acidosis and to wash the eye following a  
chemical burn.

A conjugate acid, within the Brønsted-Lowry acid-base theory, is a chemical compound formed when an acid donates a proton ( $H^+$ ) to a base—in other words, it is a base with a hydrogen ion added to it, as in the reverse reaction it loses a hydrogen ion. On the other hand, a conjugate base is what is left over after an acid has donated a proton during a chemical reaction.

A 2-year-old girl has increased work of breathing. Her father notes she had cough and subjective fever over the past 3 days. She has been complaining that her "belly hurts" and has experienced one episode of post-tussive emesis but no diarrhea. Her immunizations are current, and she is otherwise healthy. Her temperature is 102°F.

The present research investigated children and adolescents' explicit and spontaneous representation of the COVID-19 pandemic and their related emotions, cognitions, and coping strategies. We explored the self-reported protective factors and coping mechanisms, in addition to similar attributional emotional experiences, i.e., the ways participants evaluated others' pandemic experiences.
