The lower the number (f/1.4, f/2), the wider the aperture. And the more light the lens will allow in. When buying a lens, you should try to get this number as low as you can afford to go without sacrificing the focal length that you want. The lens that I use most is my 24-70mm f/2.8.

The Ultimate Camera Lens Buying Guide in 2020

Before you decide which lens to purchase, first make sure the lens will physically fit your camera. For a camera with a cropped sensor size (also known as APS-C), you can choose from a wide range of full-frame and APS-C lenses. Most entry-level DSLR and mirrorless cameras are designed with a cropped sensor size.

How to Choose the Right Camera Lenses - Complete Buying Guide

You can often save money by buying a third-party lens for your camera, but in my opinion it is best to buy a lens made by your camera's manufacturer whenever possible. Unless you have a specific reason to buy a third-party lens (usually because the type of lens you need isn't made by your camera's manufacturer) then stick with OEM (Original Equipment Manufacturer) lenses.
