What is Quick Changeover? Quick changeover is the amount of time taken to change a piece of equipment from producing the last good piece of a production lot to the first good piece of the next production lot. It's essentially the same as SMED. A Classic Quick Changeover Example. A perfect example of quick changeover is a pit-crew at a race track. How quickly the company gets the car in and out of the pit can mean the difference between winning and losing.
