The Ontogeny of Information: Developmental Systems and ...
Ontogeny, all the developmental events that occur during the existence of a living organism. Ontogeny begins with the changes in the egg at the time of fertilization and includes developmental events to the time of birth or hatching and afterward—growth, remodeling of body shape, and development of secondary sexual characteristics.

The Ontogeny of Information: Developmental Systems and ...
Ontogeny is the developmental history of an organism within its own lifetime, as distinct from phylogeny, which refers to the evolutionary history of a species. In practice, writers on evolution often speak of species as "developing" traits or characteristics. This can be misleading.
