The website features a massive collection of eBooks in categories like, IT industry, computers, technology, etc. You can download the books in PDF format, however, to get an access to the free downloads you need to sign up with your name and email address.

Toilet Paper Geometry Project

Toilet Paper Geometry is a math project that requires students to find the surface area and volume of a roll of toilet paper. Students unwind the roll of toilet paper, place it into the form of one or more rectangles, and calculate the total surface area of the roll. Then they determine how many rolls of toilet paper it would take to cover a basketball court, a football field, and a baseball diamond.

In our geometry class we recently finished a project that involved using math to find how many rolls of toilet paper are needed to cover a basketball court, a football field, a baseball diamond, and a hockey rink! Everybody had a different brand of toilet paper, and I had a roll of Angel Soft toilet paper.

ICS TOILET PAPER PROJECT - The Project!

Toilet Paper Geometry Project - Surface Area and Volume Note: Toilet Paper Geometry is formatted using US Standard units involving inches and feet, square inches and square feet, and cubic inches. The worksheets are NOT available in metric units.

Toilet Paper Geometry Project - Surface Area and Volume ...

The lateral surface area of a roll of Angel Soft toilet paper is 56.5 inches \times 2. The results from this project also show that Angel Soft is not a horrible choice when looking for the toilet paper right for you, because it is durable and soft. Now we also know that it has about 318 sheets of paper per roll, which is not a bad number.

Math in the Project! - ICS TOILET PAPER PROJECT

This roundup highlights 8 free STEM activities you can do with empty toilet paper (or paper towel) tubes. Recycled materials are great for many hands-on science and engineering activities. Paired with craft materials and some tape or glue, kids can turn recycled containers and cardboard into the basis of a fun and engaging science exploration.

8 Free Science Activities with Toilet Paper Tubes ...

Let's see how we calculate the number of days that your toilet paper will last. We estimate that an adult will use up one average toilet paper roll in about 6 days. You told us that you have got 5 toilet paper rolls. This is the formula that we have used to calculate the number of days you would be covered by your 5 rolls of toilet paper:
