Yasser Seirawan is not only a grandmaster chess player, he's a grandmaster educator and storyteller as well. The four-time U.S. champion is one of the most eloquent chess authors and commentators around. Having catapulted to the ranks of the international chess elite in his early 20s - even becoming a World Chess Championship Candidate - he quickly earned the respect and friendship of world ...

Yasser Seirawan, Chessable Author - Chessable.com

In chess, there is a general consensus among players and theorists that the player who makes the first move has an inherent advantage. Since 1851, compiled statistics support this view; White consistently wins slightly more often than Black, usually scoring between 52 and 56 percent. White's winning percentage is about the same for tournament games between humans and games between computers ...

A pawnless chess endgame is a chess endgame in which only a few pieces remain, and no pawns. The basic checkmates are types of pawnless endgames. Endgames without pawns do not occur very often in practice except for the basic checkmates of king and queen versus king, king and rook versus king, and queen versus rook (Hooper 1970:4). Other cases that occur occasionally are (1) a rook and minor ...

Pawnless chess endgame - Wikipedia

Many combinations of the first few initial moves on the board are known to establish a good position on the board. Thus, over the years, chess masters have developed what is essentially an encyclopedia of these openings. The program can use this database

Complete Guide To Chess Endgames

The chances of winning are 1 out of 252. b) Since the order matters, we should use permutation instead of combination. $P(10, 5) = 10 \times 9 \times 8 \times 7 \times 6 = 30240$. The chances of winning are 1 out of 30240. How To Evaluate Combinations As Well As Solve Counting Problems Using Combinations? A combination is a grouping or subset of items.

Combinations (video lessons, examples and solutions)

Chess is a board game for two players. It is played in a square board, made of 64 smaller squares, with eight squares on each side. Each player starts with sixteen pieces: eight pawns, two knights, two bishops, two rooks, one queen and one king. The goal of the game is for each player to try and checkmate the king of the opponent. Checkmate is a threat ('check') to the opposing king which no ...
